

SPECTRUM OF MAGNESIUM
SOLUTIONS FOR METALLURGY

ALMAMET
INTERNATIONAL GROUP

ALMAMET INTERNATIONAL GROUP

ALMAMET is the leading supplier for the desulfurization of hot metal and steel as well as Magnesium reagents for Grignard reactions and pyrotechnics.

At ALMAMET more than 250 employees operates worldwide from more than 20 locations and service centers to ensure that customer needs are met with highest satisfaction.

Through its more than four decades of industry experience, ALMAMET has acquired comprehensive know-how. This is one key factor for successful cooperation with our partners and creates added value for our customers.

The ALMAMET quality standard refers not only to the final product but also the way in which it is produced to ensure customers needs are fully met in a safe manner.

Furthermore, ALMAMET adheres to stringent quality controls and is certified according to ISO 9001:2015 (QMS) and ISO 14001:2018 (EMS). These certifications confirm our continuous effort to maintain and exceed the highest standards of quality.

Solutions and products

ALMAMET offers a wide range of solutions and products:

- | **Reagents for the desulfurization of hot metal and steel**
 - Magnesium
 - Lime-Magnesium blends
 - Fluidized Lime
- | **Calcium Carbide-based additives for deoxidation and desulfurization during steelmaking**
- | **Aluminium-Magnesium based products for the refractory industry**
- | **Products for the chemical industry**
 - Magnesium raspings and powders
 - Magnesium-Aluminium powders
- | **Plant engineering and service by ALMAMET Industrial Solutions**
 - Consulting and engineering
 - Plant construction and commissioning
 - Operations and maintenance
 - Modernization and cost optimization
 - Spare and wear parts supply
- | **OPEX and CAPEX business models available**
- | **Recycling of Magnesium alloy chips**
