

SERVICE-SOLUTIONS  
MADE BY ALMAMET

# MAXIMIZE YOUR EFFICIENCY WITH OEM SPARE AND WEAR PARTS

Reduce your downtimes to the minimum

# MAXIMIZE YOUR EFFICIENCY WITH OEM SPARE AND WEAR PARTS

## Ensure the optimum performance, long-term reliability and safety with high quality original spare parts

Ensure maximum efficiency and extended service life with our high quality OEM spare and wear parts.

ALMAMET offers a wide range of components tailored to the specific requirements up to the latest desulfurization technologies and processes.

Spare parts that should be on site due to unexpected failures or damages and may need to be replaced include:

- | Safety and control valves
- | Pressure controller, valves and gauges
- | Ball valves
- | Servo drives
- | Shut-off flaps
- | Filter regulators

Outlet control valves

Installed Outlet control valve

## Timely replacement of wear parts ensures efficiency, safety and cost savings

Replacing wear parts on time in desulfurization systems is crucial for ensuring the efficiency, safety and cost-effectiveness of the entire system over time. The timely exchange leads to:

- | Avoiding unexpected failures
- | Extending the lifespan of the entire system
- | Optimize efficiency
- | Preventing unscheduled downtime
- | Reducing repair costs
- | Ensuring system safety and comply with environmental and safety regulations

ALMAMET recommend the regular inspection and replacement of the following key wear parts:

- | Nozzles
- | Filters and Filter elements
- | Control pistons and bushings
- | Conveying hoses
- | Seals and gaskets

Nozzles

Control pistons

## Advantages

Benefit from more than four decades of experience in the desulfurization of hot metal and steel and our high quality spare and wear parts:

### | High Quality:

Our components are built to the latest industry standards and ensure reliable performance.

### | Perfect Fit:

Designed specifically for your system, ensuring seamless integration and efficiency.

### | Fast Delivery:

We understand the importance of minimizing downtimes, so we make sure your parts arrive quickly around the globe.

### | Enhanced Safety:

Genuine parts maintain the safety and compliance of your system with regulatory standards.

### | Expert Support:

Benefit from our expertise in the field. We help to choose the right parts for your specific system.

In addition to providing services and spare parts supply for its own systems, ALMAMET is also able to provide all services and spare parts, supply for third-party systems from other manufacturers.
